Working Prototype Feedback Sheet

Write each mission the way you will say it to your clients. Then one row for each turn, in the order the children took them, with the mission number in the Mission column. First names only, never a last name. Short points, not sentences. Put their exact words in quotation marks.

Mission 1	
Mission 2	
Mission 3	

Who (first name)	Mission	What they did	What the app did	What they said	Where they got stuck	Their ideas

Who (first name)	Mission	What they did	What the app did	What they said	Where they got stuck	Their ideas

At the end: "What else should we know to make this app great for you?"	Say back what they told you, in their words, then: "What did we miss?"	Before we leave LDPS: anything else I remember that is not on this sheet yet
